The Viking Times

We Have Arrived!

AD787

4 After an arduous journey
9 across the North Sea, we
13 have finally reached our
15 destination – England.
18 The feeble, afraid
21 Englishmen tried to
26 cease us but we were
30 too powerful and fought
35 our way, as brutally as
39 was necessary, onto the
43 green and lush land.

48 We are here to find
51 treasures (and probably
55 steal them) before we
60 return to our homes in
63 Norway, Sweden and
64 Denmark.

81 protected and contained
85 valuable goods like gold
88 and jewels, imported
92 foods and other useful
95 materials for trade.

70 Our first raid was of the
73 monastery at Lindisfarne,
78 which was not very well

99 England is more pleasant
103 and lucrative than we
104 thought!

Finding Prime Factors

Know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers.

Every number has a unique set of prime factors. (Prime numbers can be multiplied together to make the number.) These can be found using a "Factor Tree". Find any factors of the number, then the factors of those numbers until you can't go any further – the resulting numbers will be the prime factors.
