

## Healthy Snack Creation

### Healthy bubblegum

Tell me more about your creation here.

Starting as an apple, the apples fall on the conveyor belt and then they get chopped by a robot claw holding a knife, the robot claw holding a knife moves the chopped apples onto the conveyor belt, they are near the squashers which squishes the apples to make juice and into the bowl with a tiny hole and it dribbles every second for the bubblegum.

Starting as a bubblegum, the fabric uses every kind of gum, they move on the conveyor belt into the no taste tunnel, inside... there were 3 same sprays, the effect... they make no taste or smell then they get out to get the apple juice on them.

the pack, "made with real apples"
